Karunakara, Unni Krishnan, et al. "Traumatic events and symptoms of post-traumatic stress disorder amongst Sudanese nationals, refugees and Ugandans in the West Nile." *African health sciences* 4.2 (2004): 83-93.

Standard Treatment

Research Frontier: Electroencephalogram (EEG)

Research Question

Can we improve access to PTSD screening with a low cost, fast and flexible automated wearable system?

Resources

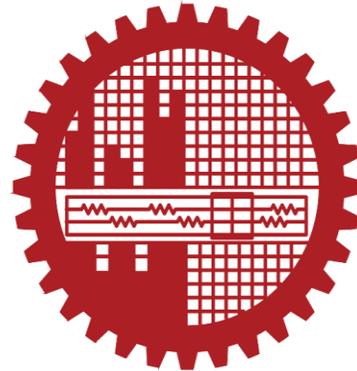

The **MINI** Questionnaire

\$112 NeuroSky Mindwave

Two Tell-tale Perspectives of PTSD: Neurobiological Abnormalities and Bayesian Regulatory Network of the Underlying Disorder in a Refugee Context

Farhana Shahid, **Wasifur Rahman**, Anika Binte Islam, Nipi Paul, Nabila Khan, Mohammad Saifur Rahman, Md Munirul Haque, and A. B. M. Alim Al Islam

Goals

Detecting Relevant EEG Signals

Bayesian Model

Validation

Future Work

Guidance

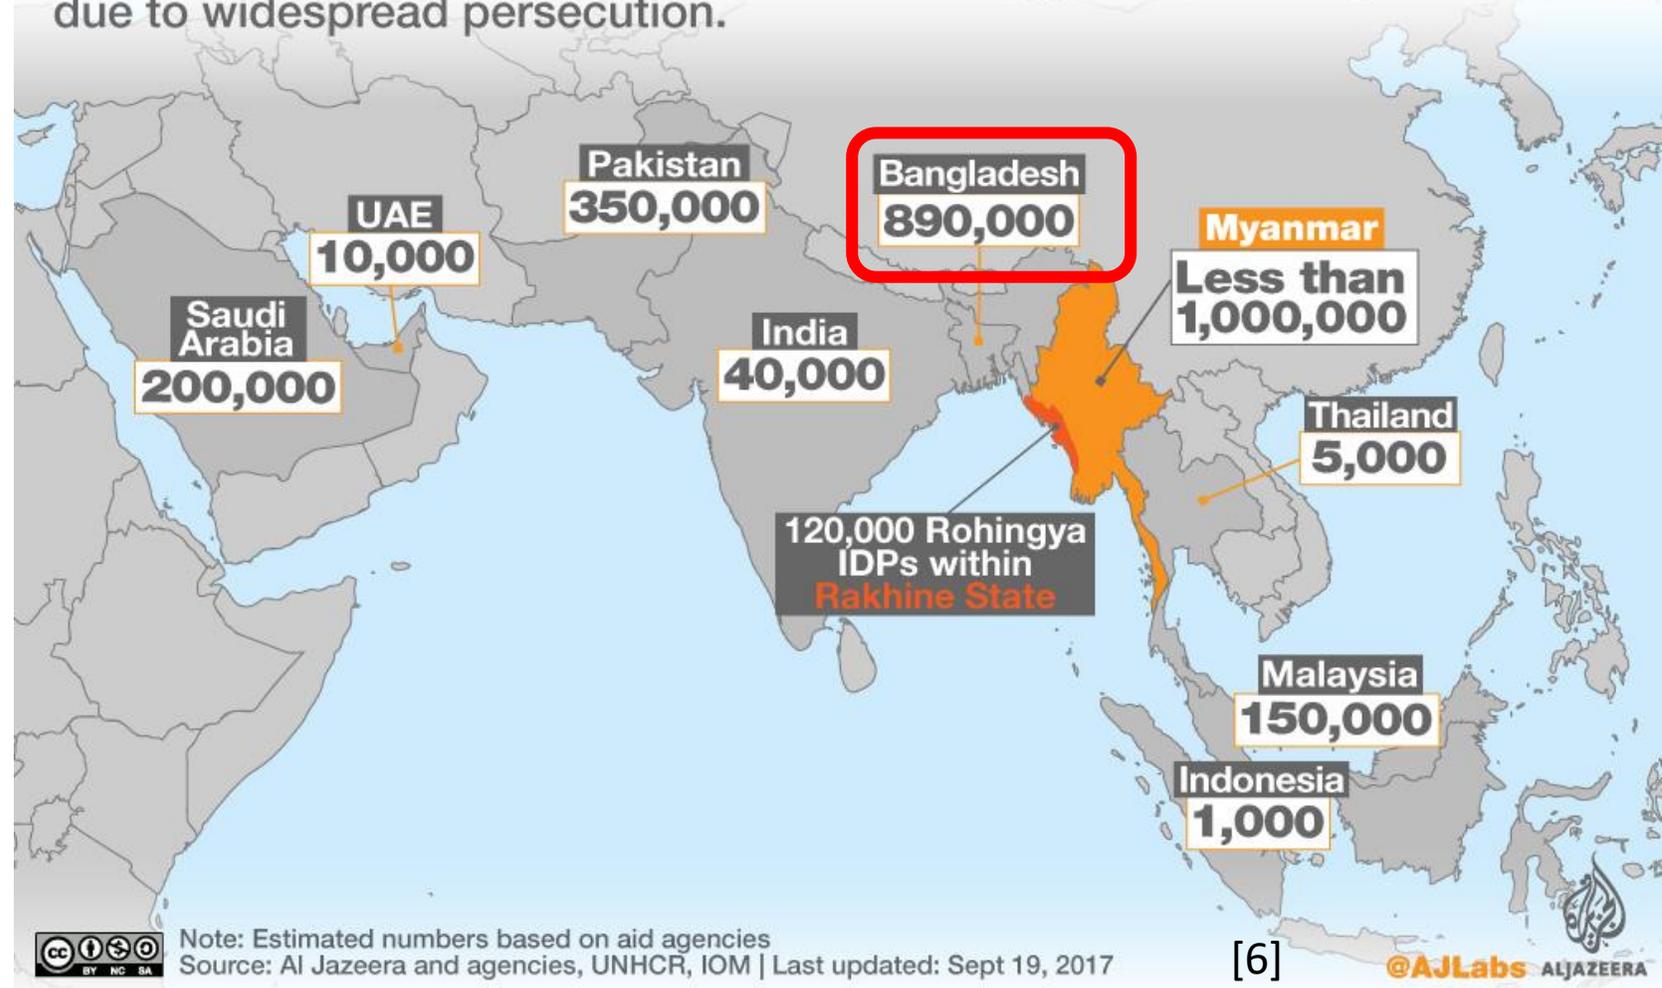

Refugee Population

Following Myanmar's fleeing Rohingya

Since the late 1970s, nearly one million Rohingya have fled Myanmar due to widespread persecution.

Refugee Camp

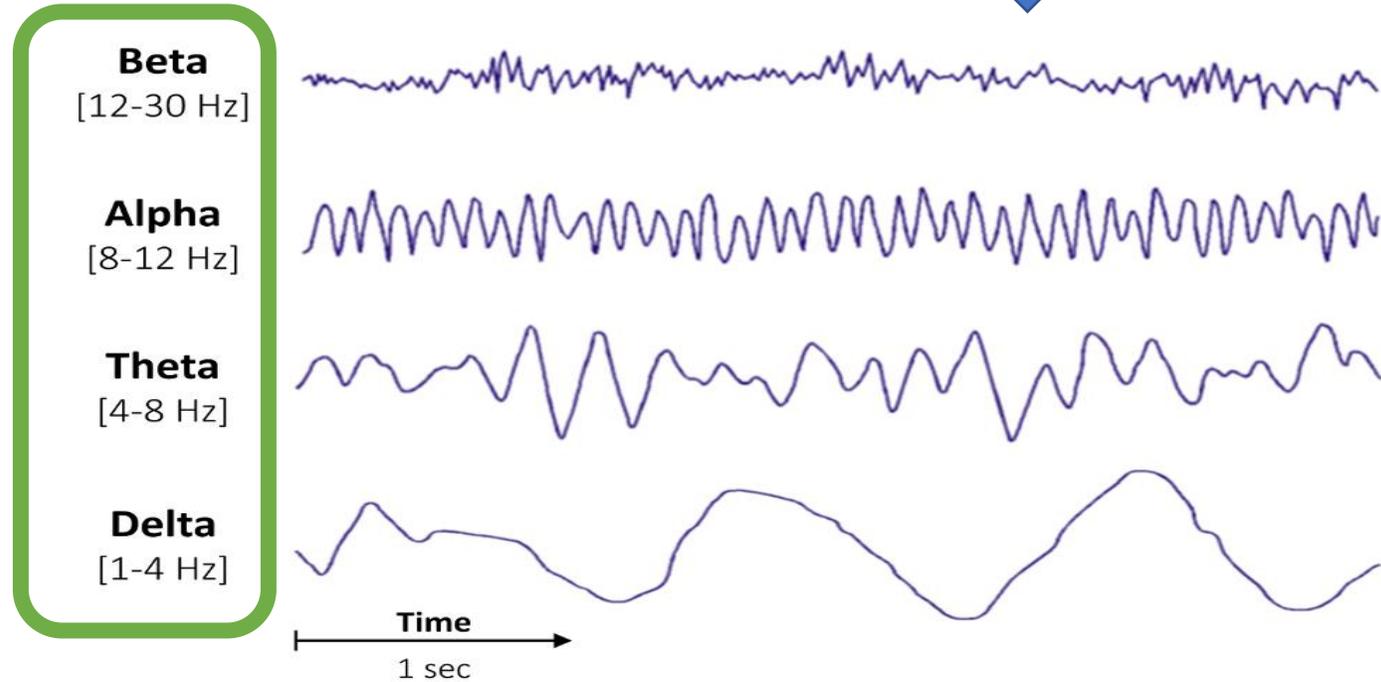

[7]

Interview

Data Collection in Rohingya Camp

EEG Data Collection

<https://raphaelvallat.com/bandpower.html>

MINI Data Collection

The **M**ini-**I**nternational **N**europsychiatric **I**nterview (**MINI**)

Sheehan, David V., et al. "The Mini-International Neuropsychiatric Interview (MINI): the development and validation of a structured diagnostic psychiatric interview for DSM-IV and ICD-10." *The Journal of clinical psychiatry* (1998).

Compatible with both ICD-10 and DSM-V disorders

PTSD Module

Q4: Do you have trouble recalling exactly what had happened?

Probable PTSD

Data Overview

#Control = 45
#PTSD refugee= 49

Beta
[12-30 Hz]

Alpha
[8-12 Hz]

Theta
[4-8 Hz]

Delta
[1-4 Hz]

Time
1 sec

1. **PTSD** as defined by **MINI**
2. Feeling **distressed**
3. **Nightmare**
4. **Avoiding** trauma-related stimuli
5. Inability to **recall** key features of trauma
6. Difficulty in **sleeping**
7. **Irritability**
8. Difficulty in **concentrating**
9. Feeling **nervous**

Validation

	Low Alpha	High Alpha	Low Beta	High Beta	Mid Gamma
PTSD					
Distress					
Nightmare					
Avoidance					
Recall Inability					
Sleeping Difficulty					
Irritability					
Concentration Difficulty					
Nervousness					

Only showing entries with $p < 0.01$ after **Benjamini-Hochberg** multiple test correction

Thissen D, Steinberg L, Kuang D. Quick and easy implementation of the Benjamini-Hochberg procedure for controlling the false positive rate in multiple comparisons. Journal of educational and behavioral statistics. 2002 Mar;27(1):77-83.

Summary

- A low-cost, fast and flexible system for identifying PTSD-related EEG signals
- **Validated** by pilot study with Rohingya refugees.
- Findings are largely in **agreement** with the prior research.
- **Bayesian network** to understand PTSD symptoms.
- Opening the door towards detecting PTSD with wearable device only.
